SECOND HALF | PREVENTION

ALARM AND EVACUATION

Leave safely. Gather at the green “Ponto de encontro” assembly-point sign.

1. Hazards and risks

Hazards: Smoke, fire and obstructed escape routes.

Risks: Smoke poisoning, burns and difficulty leaving the site.

2. Before you start

- Know the alarm and site instructions.
- Locate exits and the designated assembly point.
- Know how to call for help and assist others.

3. Stop and report

- Smoke, a burning smell or an evacuation alarm.
- Blocked route: use the planned safe alternative.
- Missing person or blocked exit: report it.

4. What to do: four prevention steps

1

Raise the alarm

Activate the alarm as set out in the plan.

2

Leave

Follow the indicated safe route.

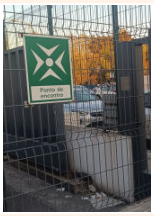

3

Assemble

Go to the designated assembly point.

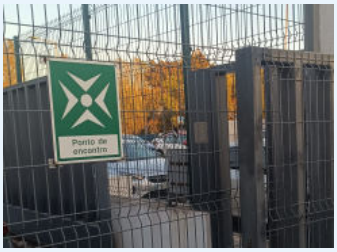

4

Wait

Do not return without authorisation.

5. Our assembly point: recognise this location

Beside the outer fence and the gate.

Personal belongings: Do not delay leaving to collect items.

Lifts: Do not use lifts during a fire.

Smoke / blocked exit: Do not cross an unsafe area; ask for help.

Headcount / information: Report missing people and hazards observed.

Good practice: In an emergency, call 112 from a safe place and give the location and situation. Firefighting requires training and safe conditions.

6. FORTNIGHTLY ACTION Identify the exit and assembly point for your workplace. Report an obstructed passageway.

KNOW THE EXIT • LEAVE • DO NOT RETURN
